

APT and Shell Script Guide

Using APT

Update: `sudo apt update` `sudo apt upgrade`

Install: `sudo apt install packagename`

Remove: `sudo apt remove packagename`

Purge: `sudo apt purge packagename`

Clean: `sudo apt autoremove` `sudo apt clean`

Shell Script Steps

1. Create file: `<file_name>.sh`
2. Add: `#!/bin/bash` `echo "Hello"`
3. Save and exit
4. Open Terminal in Folder
5. Run: `bash ~/<Folder_name>/<File_name.sh>`
